

Innovative Sustainable Business Tools Track Progress and Measure Impact

How can I make collecting sustainability data more affordable?

How do I figure out what to measure?

How do I determine which people or farms and how many to sample?

Can I use just one system across different countries or supply chains?

How do I integrate this data into my regular operations?

How do I know that my data is credible and reliable?

Real-time information dashboards track performance

COSA is a non-profit and independent, global consortium of partner institutions dedicated to accelerating agricultural sustainability through robust information systems.

COSA is financed in part by leading agencies including the Swiss Government (SECO), Ford Foundation, and InterAmerican Development Bank (MIF).
